AREAS OF INTEREST

- Competitive Programming
- Data Structures
- Object Oriented Programming
- Database Management System (RDBMS)

PROJECTS

- Library Management System
  Brief Description : It is a Java Application based on multi client server architecture using Java SWING at its front end and MySQL Database server at its back end. It serves the purpose of maintaining a university library. It features two types of clients : Administrator and Librarian. Librarian maintains the inventory of the books available and issued. Administrator maintains the list of librarians who have access to the client part of the application.

- Box Office Prediction Using Social Media and IMDb analysis
  Brief Description : It is a practical implementation of a supervised machine learning algorithm, K Nearest Neighbours (KNN) algorithm, for classifying a pre selected set of movies by collecting data from social media and IMDb into three distinct categories : "hit", "mediocre" and "flop", indicative of the movie's performance in the box office.

- Online Judge System
  Brief Description : It is a Java based application using Java SWING at its front and MySQL server at its back end. It can not only be used as an IDE for unregistered users to type their code in and execute, it can also be used by registered users for solving problems put up on the platform and score marks. The users are also ranked based on their total score obtained.

COMPUTER SKILLS

- Languages : C, C++ (STL) , Java, Python
- Databases : MySQL
- Web Scraping

ACHIEVEMENTS IN ACADEMICS

- Awarded Certificate of Merit from the Central Board Of Secondary Education in class X.
